

## **Innovative Architects Selected As a Atlanta Journal Constitution Top 100 Workplace**

*The metro Atlanta custom software development and consulting company lands at No. 16 on the Top 40 Small Companies list*

Atlanta, Ga. – March 24, 2014 - [Innovative Architects](http://www.innovativearchitects.com), a custom software development and consulting company (<http://www.innovativearchitects.com/lp-it-consulting.aspx>), is pleased to announce that it has been selected as one of [The Atlanta Journal Constitution Top 100 Workplaces](#). The Top Workplaces are identified by the AJC and its partner, Workplace Dynamics, after employees at 211 participating metro companies were surveyed in the 2014 contest. Each company required an employee survey response rate of at least 35 percent for Atlanta-based employees.

Employees were asked to complete a confidential survey on a variety of workplace satisfaction issues, and those results were benchmarked against the responses of all participating companies. They were asked to assess, from their perspective, Innovative Architects' organizational health - its direction, their connection to the company, and the company's ability to execute. Employees were also asked to assess their jobs.

"Innovative Architects prides itself on providing a unique atmosphere for its employees. From silly fun at Halloween costume contests and cheering on the fan favorite Atlanta Braves at our company picnic to working together at charity events and making a difference in the community at large, employees are more than just coworkers; they're family," said Tim Shine, Chief Delivery Officer of Innovative Architects. "We aim to put our employees and their families first to ensure a happy work-life balance. Whether working from home, on a client site, or in our main office, employees are collaborating, pushing to learn new skills, and constantly growing as a team and as individuals."

Since its 2005 inception, Innovative Architects has experienced tremendous growth. The company has grown in size and talent, allowing financial success to flourish in both company revenue and salary compensation. “We have also been fortunate to have great job growth allowing our employees to achieve deeper knowledge across many different technologies as newer projects continue to expand what is in our “wheelhouse,” said Shine. “Perhaps the most literal meaning of growth can be found in our location growth; IA recently opened a satellite office in Alexandria, VA in 2013.”

To support its growth, Innovation Architects is [hiring](#) to extend their corporate family.
